

SAFE TECHNOLOGY and DIGITAL CITIZENSHIP

The following will be included in trainings and on the School LAND Trust Website:

The intent of HB 213 Safe Technology Utilization and Digital Citizenship in Public Schools is to involve school community councils in an on-going discussion (at least annually) about creating a safe technology environment for students in public schools. As with other responsibilities of school community councils, it is intended that administrators, staff and parents work together to bring about the best possible result for students.

The State Board Rule R277-491 requires a report to the councils from the district and school level administration about the technology and training that is currently in place at your district and school. The report will provide some background for the councils to begin a school specific discussion of safe technology and digital citizenship.

Administration Responsibilities – Report to School Community Councils

The district report should include but may not be limited to:

- **What filters are being used and how do they work?**

Canyons School District utilizes the Lightspeed Systems content filter. The Web Filter detects and/or blocks access to inappropriate material on the Internet based on an extensive, education-specific URL database with more than one billion entries, as well as CSD custom allow and block lists. Lightspeed content filter, groups sites into about 120 school-specific categories based on subject matter and age-appropriateness, providing easy review and administration.

When a user attempts to visit a site, the policy for the user is checked and the site is either blocked or allowed accordingly. The filter is intended to protect from inadvertent exposure, however it cannot prevent a determined user from finding inappropriate content.

- **Are there different settings used for different grades and school levels?**

Elementary, Middle and High school as well as staff each have unique filtering settings. These settings tend to be more restrictive at the lower levels and least restrictive for staff.

- **What is district filtering policy on frequently used sites such as YouTube, Google Images, Weebly, and etc.?**

Youtube is blocked at the elementary level and allowed at all other levels. Facebook is blocked at the elementary and middle school levels and allowed at all other levels.

Google Images is allowed but forced to “Safesearch” for all users.

Weebly is allowed for all users.

Tumblr is blocked for all users.

- **Are there management systems available (MDM, Chrome management, LanSchool, and etc.) that can add additional control and who accesses those systems?**

The Information Technology Department utilizes several management systems including: LanSchool for Macs and PCs, Google Apps for Education for ChromeOS, and Lightspeed MDM for student iOS devices.

- **What resources does the district provide concerning educating students on safe internet use and digital citizenship?**

The District employs a train the trainer model, utilizing a teacher in each school who has received specialized training on Internet safety and digital citizenship. This teacher, called the School Digital Citizenship Coordinator, receives a stipend to provide training to staff, students, and parents throughout the year. CSD also utilizes the [NetSafe Utah](#) and [Common Sense Education](#) curriculum resources. NetSafe Utah provides online videos and resources for students, parents, and educators including the Internet Safety information that Utah schools need to meet the Children's Internet Protection Act (CIPA) requirements. The Common Sense Education curriculum series includes 18 to 24 lessons for elementary, middle, and high school students, and is distributed using the Nearpod online platform.

- **What is the protocol in district schools when inappropriate content is accessed for students, employees and parents?**

CSD IT is not actively investigating inappropriate behavior. If alerted by a parent, teacher or principal that inappropriate behavior is suspected, IT will pull the internet history of the user in question. CSD systems track the last 40 days of internet traffic for all users.

- **Explanation of district capabilities or inability to change filtering, settings and management tools without incurring additional expense to district budgets. Where applicable, districts could include what is provided in connection with e-rate funding.**

CSD has the ability to create District-wide Allow and Block lists. Allow lists allow CSD to override the filter default settings to allow sites to be accessed. Block lists allow CSD to override the filter default settings to block sites. The District also has the capacity to customize allowed and blocked sites by school type. Elementary has a more restrictive set of filter rules than secondary schools.

Schools should add to the district report (at a minimum): [Power Point for Eastmont](#)

- What devices are being used and how are classes using them?
- What are the main applications, programs, and sites used in different classes, grade levels, and subject areas?
- What supervision practices are in place when students are online?
- Are there management tools used that allow teachers to digitally monitor student use or limit access to some applications or sites?

- What are the school rules when inappropriate information appears for students, staff and parents? Are there safe reporting procedures for students, staff, and parents so that reporting is safe and encouraged, when it happens?
- How does the school balance access and safety appropriate for the grade levels at your school?
- What does the administration see as their greatest threats for students?
- What are the policies in place for devices brought from home – tablets, cell phones, etc.?
- What does the administration see as the greatest threats for our students on the internet or elsewhere online?
- What does the administration see as important opportunities for our students related to constructive, proactive technology use?
- Explanation of training currently provided:
 - To students about digital citizenship and safe use of technology?
 - To parents and guardians about how to discuss and support digital citizenship and safe technology use with their children and how to report inappropriate content?

Eastmont Middle School: [Eastmont Digital Safety Links](#).

- **NearPod presentation links for student instruction:** [First](#) lesson [Second](#) lesson. (Ms. Miles taught 11/9-10 to Ms. Greeno's 7th Grade Health students) and collected the following data from 4 of her classes, compiled as follows:

Students want to learn more about how to be safe on-line:

Social media that the students are on (Snapchat was added, most put other when it wasn't available as an option):

Ways students access the Internet (other device is usually a gaming device or iPad):

Whether students think violence in the media impacts behavior:

If students know of instances where someone has been cyberbullied:

- Our message for November was a [link to common sense media](#).
- October: Are your students representing their true selves online? It's so easy to portray yourself as something you aren't. Play this video and talk to your students about the importance of [being true to yourself online](#).
- September: School is back in full swing! As your students are working hard to complete their assignments and projects, are they thinking about Copyright and Fair Use? Being knowledgeable about these principles are an important part of being a responsible digital citizen. Here is a short video to help introduce, or remind your students about these [important concepts](#).

DATA collected at Eastmont Middle School from the Teachers:

What Kind of Devices do you use? (check all that apply)

28 responses

Check all programs your students use school devices for.

28 responses

What supervision practices do you use when students are online?

What are the procedures if a student accesses inappropriate material online? (check all that apply)

DATA collected at Eastmont Middle School from the Administration:

What does the administration see as their greatest threats for students online or elsewhere?

1 response

Social Media

What does the administration see as important opportunities for our students for constructive, proactive technology use?

1 response

I think technology is best used to solidify concepts or make learning more concrete.

What are the school rules when inappropriate information appears for students, staff and parents? Are there safe reporting procedures for students, staff, and parents so that reporting is safe and encouraged, when it happens?

1 response

It depends on what we are reporting. I might need more clarification with this question. The school does have policies about technology violations, but in regards to reporting, students can report directly to administration or counseling any concerns that they have and they also have access to the SafeUT Crisis Line reporting App

Yearly Digital Citizenship Plan

Digital Citizenship materials are available in the library and are provided during PTC

We show digital safety messages in our video announcements

A monthly message is sent to teachers about student safety (included in Principal's message to parents when applicable)

We will have the NetSmartz assembly January 24th

During digital citizenship week we teach daily lessons (February)

Information on Digital Safety is on our [website](#)

7th Grade Health Curriculum

CSD Parent Digital Citizenship Night was Nov. 3rd 5-7 PM

Council Responsibilities

School Community Councils may create a subcommittee to help accomplish the following responsibilities, entirely or in part, and may partner with non-profit organizations to assist in the education components. It is the responsibility of the council to see that the following is completed each year:

1. Receive the report from the district and school administration (as described above).
2. Discuss the report and decide:
 - A. **Technology.** If the filtering, management systems, and supervision practices are appropriate. If not, identify what needs to be addressed in the context of what the school and district are capable of providing under the current filtering and management systems, supervision availability, and financial restrictions. Establish an action plan to address identified concerns.
 - B. If **student education** currently implemented is appropriate and adequate. If not, identify how it could be strengthened, set goals to improve the education and create an action plan to accomplish the goals.
 - C. If the **parent/guardian education** component currently implemented is appropriate and adequate. If not, identify how it could be strengthened, set goals to improve the education component and create an action plan to accomplish the goals. The council should then implement the action plans or may delegate portions to be completed with a timeline for reporting back to the council.

School Community Council Discussion Items

- A. Definitions to inform the discussion
 - **The internet** is an electronic communications network that connects computer networks and organizational computer facilities around the world. (*Merriam-Webster*)

- A **computer filter** is software that prevents someone from looking at or receiving particular kinds of material through the internet or software for sorting or blocking access to certain online material. (*Merriam-Webster*)
- **Digital citizenship** means the norms of appropriate, responsible, and healthy behavior related to technology use, including digital literacy, ethics, etiquette, and security. (*Utah Code*)

B. Discussion Questions

1. We have received a report from the district and school administration about filtering and management tools that are in place at our school as well as education currently being provided for students and parents.
 1. Are there any questions?
 2. Do you feel you have enough information to complete the council responsibilities related to safe technology and digital citizenship?
 3. If not, what additional information do you feel you need to make informed decisions?
1. Understanding the greatest threats to our students that have been identified by the administration, what should be done to address those concerns specific to our school and students?
 - Identify the issues and how each can best be addressed through technology, monitoring, supervision, education, other means, or a combination.
 - Keep these specific concerns in mind as the technology and education responsibilities are discussed.

Technology

1. Are we comfortable with the filters, management tools and monitoring, and supervision being provided at our school?
 - If not, what recommendations does the council have for the school administration and staff?
2. Are the recommendations possible given the physical and economic constraints in place?
 - If not, is there something else the staff and school administration could do to minimize the concerns raised by the council?
3. What is the action plan with timelines to accomplish the goals agreed to by the council and administration? What is the timeline including a completion/reporting timeline to report back to the council?

Student Education

1. Is the council comfortable with the student education being provided and the groups providing the education?
2. Would the council like to receive some feedback/input from students about their experience in the training?
 - If not, where does there need to be improvement?
 - How will the issues needing improvement be addressed?
 - Who will address them and how. What is the timeline including a completion/reporting timeline to report back to the council?

Parent Education

1. Is the council comfortable with the parent education being provided and the groups providing the education?
 - If not, what improvements could be made?
2. How will the issues needing improvement be addressed?
 - Who will address them and how. What is the timeline including a completion/reporting timeline to report back to the council?
3. Are there other issues the council would like to consider? Would the council/students like to implement an opportunity/experience for students to engage in digital citizenship projects that could produce positive outcomes?
 - If so, what are they?
 - How will the identified issues or opportunities best be addressed?
4. Perhaps the council would like to engage students in this discussion to learn what concerns they have and/or what opportunities for positive projects they identify.
 - Who will address them and how. What is the timeline including a completion/reporting timeline to report back to the council?

Summary

1. Have we addressed the greatest threats and opportunities identified by the staff, administration, students, and council?
2. Have we included timelines/reporting dates back to the council, and who is responsible to complete the action plans?
